FOUR DECADES OF COMMITMENT, INNOVATION, AND LEADERSHIP IN CLEANING AND DISINFECTION SOLUTIONS THAT CROSS BORDERS.

Dear colleagues, customers, and friends of DSP,

It is a pleasure to address you in this very special edition of our magazine — a milestone in our journey. At DSP, we are at an exciting turning point: we are preparing to celebrate a truly significant event — our 40th anniversary in 2025. That's four decades of effort, innovation, and unwavering commitment to excellence in the cleaning and disinfection industry — and with an increasingly global outlook.

This anniversary is a source of immense pride, representing decades of hard work, ongoing evolution, and steady growth.

Over the past 40 years, we've remained true to our family-business roots and values while constantly adapting to the times — improving not only our products, but also our processes and systems. Our mission remains the same: to deliver efficient, safe, and sustainable solutions that drive us every day.

Through the years, we have overcome major challenges — including a full-scale factory fire in November 2000 — and emerged stronger, reinventing ourselves and forging lasting relationships with our clients and partners. These relationships have been fundamental to our success.

This ninth issue of our magazine is a reflection of all the work we're doing — always with an eye toward the future, while honoring our roots and the path that brought us here.

I want to take this opportunity to deeply thank everyone who has been part of this journey:

To our employees, whose talent and dedication are the foundation of our success;

To our customers, for their unwavering trust;

And to our suppliers, for walking this path with us every step of the way.

The year 2025 will be a year of celebration — but also of new challenges and opportunities. I am confident that together, we will continue to grow and evolve.

Enjoy this edition and join us in the exciting countdown to our 40-year legacy.

With gratitude and enthusiasm,

José Tortosa

A FAMILY BUSINESS, A GLOBAL VISION,

A JOURNEY THAT HAS CROSSED BORDERS

Behind DSP's international growth stands a family whose shared vision has shaped every stage of the journey. From father to sons, **dedication, perseverance, and a strong sense** of purpose have driven the company far beyond its origins, turning a family project into a global reality present in multiple countries and still expanding its horizons.

Internationalization is not just a strategic objective for DSP, it is a natural evolution of who we are. With a solid presence in multiple countries, we continue to consolidate our position in established markets while actively exploring new territories where our expertise in professional hygiene can make a difference. Each new market represents an opportunity to

A family-owned company with a global vision

understand local realities, regulatory frameworks, and operational challenges. We adapt our solutions to specific regional needs without ever compromising the highest international quality and safety standards that define us.

We invest in long-term partnerships, strengthen local distribution networks, and support the development of infrastructure that ensures efficient and sustainable operations. By doing so, we generate a positive economic and social impact in the countries where we operate.

DSP brings more than advanced hygiene solutions to international markets. We bring knowledge, innovation, and values. Trust, proximity, and long-term commitment are the foundations on which we continue to expand borders and build lasting global relationships.

More than 40 years evolving with purpose

• CHRONOLOGY OF AN ENGAGEMENT •

More than 40 years of experience are not simply measured in time, but built step by step. The evolution of our logo over the decades reflects DISARP's continuous growth, our ability to adapt to new markets, and our ongoing commitment to innovation in the professional hygiene sector.

Each version of our visual identity has accompanied a key stage in the company's development, from our early beginnings as a family business to becoming an international benchmark. We have evolved in image, structure, and global reach, while always preserving the values and quality standards that define us.

Our brand identity tells a story of resilience and ambition. As markets have changed and new challenges have emerged, DISARP has continued to strengthen its positioning, expand internationally, and invest in research and development. The transformation of our logo mirrors this strategic evolution and our readiness to lead in a competitive, global environment.

Beyond aesthetics, our visual evolution represents trust built over decades. Clients, partners, and distributors across multiple countries recognize in our brand a symbol of reliability, technical expertise, and long-term commitment to professional hygiene solutions.

Today, with over four decades of expertise, we continue to look ahead with the same determination that inspired us from the very beginning. Because growth is not about changing who you are, but about strengthening your identity to go even further.

Four decades of experience, innovation, and international growth reflected in every stage of our brand evolution.

WE ARE THE MANUFACTURERS BEHIND THE ECOZ REVOLUTION.

You decide when it
reaches your shelves

Sustainable cleaning solutions designed to win over today's conscious consumer and tomorrow's market.

ECOZ is the result of decades of manufacturing expertise applied to a new consumer reality. At DSP, we design and produce sustainable cleaning solutions that meet the highest standards of performance, safety and environmental responsibility. Every formula is developed to deliver professional-level results

**MANUFACTURED BY
EXPERTS.
CHOSEN BY CONSCIOUS
CONSUMERS.
READY FOR YOUR
SUPERMARKET.**

while responding to the growing demand for eco-conscious products in mass retail.

From sourcing and formulation to production and packaging,

ECOZ is built for scale. Our manufacturing capabilities allow retailers and brands to rely on consistent quality, competitive positioning and reliable supply. This is not a trend-driven product line — it is a long-term solution designed to perform on the shelf and in the consumer's home.

Today's shoppers are actively choosing brands that align with their values without compromising effectiveness. ECOZ makes that choice easy. By combining proven cleaning efficacy with a strong sustainability commitment, it helps retailers strengthen their eco assortment and connect with a fast-growing segment of conscious consumers.

The ECOZ revolution is already underway. **Now, it's your move.**

EXPANDING INTO NEW INTERNATIONAL MARKETS

With 40 years of experience in the industrial hygiene sector, DSP continues to grow and position itself as a global benchmark. Our company — known for its commitment to innovation, sustainability, and quality — has taken a bold step forward in its international expansion, bringing our solutions to new horizons.

Global Presence, Local Impact

DSP's journey toward internationalization has taken us into strategic markets such as Portugal, Switzerland, the United States, Bulgaria, and Bosnia, solidifying our presence in key industries.

Each new market represents an opportunity to adapt to local needs, offering products

and services that meet the highest international standards of hygiene and disinfection.

Our entry into these markets has allowed us to build strategic alliances with local companies and distributors — strengthening our operations and ensuring that our products reach customers efficiently.

We are also investing in local infrastructure and training, creating a positive impact in the economies where we operate.

At DSP, we don't just export products — we export values. Our business philosophy is rooted in building trust and lasting relationships.

DSP Expands Its Leadership in Professional Hygiene into Key International Markets

With innovation, sustainability, a quality as our foundational pillar we continue to evolve to offer solutions that make a real difference in an increasingly globalized world.

Growth driven by Innovation

DSP continues to grow and strengthen its position as a global benchmark in hygiene. Our company — recognized for its commitment to innovation, sustainability, and quality — has taken a decisive step forward in international expansion, bringing our solutions to new horizons.

This success wouldn't be possible without our constant commitment to innovation.

At DSP, we develop products tailored to the unique challenges of each industry — from simple and equipment cleaning to advanced laboratory water treatment, and personal care solutions.

Innovation is the engine of our growth. Our R&D teams work tirelessly to create new formulas, optimize processes, and integrate advanced technologies that enhance the efficiency and safety of our products.

This commitment enables us not only to meet, but to exceed our clients' expectations, while swiftly adapting to international regulations and the demands of the global market.

Sustainability as a Strategic Priority

We are actively committed to circular economy initiatives, such as using recyclable packaging materials and designing biodegradable products that minimize environmental impact.

DSP also partners with both international and local organizations to promote sustainable practices across all levels of the industry. This approach not only benefits the environment, but also creates value for our clients and communities.

BRINGING HYGIENE EXCELLENCE TO EVERY CORNER OF THE WORLD

DSP has positioned itself as a benchmark in the industrial hygiene sector thanks to its active participation in both national and international trade fairs.

These events are key to showcasing our innovations and highlighting our experience as manufacturers

We have established ourselves as a leader in the industrial hygiene sector, and one of the pillars of our expansion strategy is our active participation in cleaning trade shows, both nationally and internationally. These events provide us with a unique opportunity to reach a diverse audience, from distributors and industry professionals to customers interested in cutting-edge solutions.

INNOVATIONS THAT MAKE A DIFFERENCE

At each fair, we present our latest developments — such as ECOZ, a revolutionary system that combines efficiency and

A FAMILY-OWNED MANUFACTURER

sustainability. This technology exemplifies our commitment to innovation, offering solutions that not only

meet the highest standards, but also anticipate the future needs of our customers.

As manufacturers, we maintain full control over the design and quality of our products, ensuring compliance with the strictest

GLOBAL AND NATIONAL PRESENCE

standards. Our family-business roots add an extra layer of value: closeness,

HYGIENALIA 2023

commitment, and personalized attention, which set us apart in the industry.

We've had a presence at flagship international fairs such as Las Vegas, Chicago, Amsterdam, and South Africa, bringing the DSP brand to key global markets.

We've established ourselves as a leader in industrial hygiene. The pillars of our expansion strategy is our active participation in professional cleaning trade shows, both in Spain and abroad.

These events offer a unique opportunity to connect with a wide audience — from distributors and industry professionals to clients looking for cutting-edge solutions.

At these events, we also strengthen strategic alliances with distributors and explore new business opportunities — always with the goal of providing innovative and locally adapted solutions.

INTERCLEAN AMSTERDAM 2024

In Spain, we take part in trade shows such as Hygienalia in Madrid, along with various specialized conferences in the hospitality and healthcare sectors, reinforcing our strong connection to the domestic market.

Our stands aren't just product displays — they're meeting points for professionals from all industries, from food processing to healthcare and hospitality, who seek out solutions that truly make a difference. At DSP, every trade show is more

**It's not just about setting up a booth.
Or showing products.
Or handing out catalogs.**

PLMA AMSTERDAM 2024

CLEANTEX SOUTH AFRICA 2024

XXV HOSPITALITY CONGRESS 2024

than a business opportunity — it's a space to exchange ideas, understand evolving market needs, and share our vision of a cleaner, safer, and more sustainable future.

For DSP, attending international trade fairs means much more —

It's a statement of intent.

It's about putting faces to the names of those who

trust us.

It's about listening in real time to the challenges the industry faces. It's about looking in the eyes of people who share our passion for professional hygiene. Because at every trade fair, there are conversations that don't fit in an email, ideas born from a handshake, and solutions built by sharing experience. That's

ISSA LAS VEGAS 2024

PLMA 2025

why we keep showing up. And we'll continue to do so. Because we believe that being there — on the front lines — makes us better. It drives us to innovate, improve, and evolve. Every meeting, every bit of feedback, every connection matters. And while the digital world has changed many things, there's one thing no screen

can replace: human connection. At DSP, we know that well. So when people ask us if it's still worth going to trade fairs, our answer is always the same:

ABSOLUTELY.

See you at the next trade fair!

RESPONSIBLE PRODUCTS FOR A CLEANER PLANET

In a world increasingly aware of the need to care for the environment, sustainability has become a key pillar in the industrial cleaning sector. At DSP, we understand the importance of manufacturing products that are not only effective, but also environmentally responsible.

Choosing sustainable materials and environmentally respectful manufacturing processes is essential to reducing our ecological footprint. At DSP, we are committed to using biodegradable ingredients and recyclable packaging, ensuring our products are as safe for the planet as they are for the people who use them. The use of eco-friendly cleaning pro-

ducts benefits not only the environment but also the businesses that adopt them. These products help improve air and water quality, protect worker health, and reduce the risk of contamination during production. By minimizing the use of harsh chemicals, we also help preserve natural resources for future generations.

DSP leads by example — constantly innovating to provide cleaning solutions that respect the environment without compromising on quality. We invite our clients to explore our eco-friendly product lines and join us in building a more sustainable future for everyone.

We manufacture cleaning products with biodegradable materials and recyclable packaging, offering solutions that protect both people and the planet.

**The only company on the market offering
non-rigid systems for your business**

WHAT IS ECOZ

EFFICIENCY

Revolutionary system, which allows you to replace the product capsules and reuse the dispenser, with the consequent economic and ecological benefits.

SYSTEM

A new and better way to clean your house, and new and better things coming out is what makes consumers switch.

INNOVATION

Innovating is synonymous with improving, and improving is synonymous with changing. When innovations are punctual or anecdotal, the changes they cause are anecdotal. But when innovations are important, they change everything.

THERE ARE TWO POSSIBILITIES OF USING THE BAGS:

·IN SPRAYERS

In which are products such as degreasers, multipurpose, specific cleaning of furniture, bathrooms, air fresheners, etc.

·IN SOAP DISHES

In this case we find liquid gel and foam products such as soaps, hydroalcoholic solutions, shampoo, dishwasher, etc.

INNOVATION

IN PRODUCTS AND SYSTEMS

BETTER MANAGEMENT OF SPACE, STORAGE AND RECYCLING

95 BAGS FROM OUR ECOZ SYSTEM = 1 BOTTLE OF ANOTHER PRODUCT

DISARP seeks a better world by educating people to use cleaning systems that avoid plastic waste. For this reason, its latest product developed by its R+D+i team is EcoZ®, the range of cleaning products that meets the Ecolabel criteria of the European Union. Under the environmental ISO14001 and ISO 9001 certifications certified by Bureau Veritas, DISARP produces with a more sustainable future in mind with easy-to-use ecological products and systems.

DISARP has received the INNOVATIVE SME certificate for its development of systems and products with great added value in R&D&i
